## Fence

To make the fence in front of the house, score all dotted lines and cut out the fences sections. Do not cut out the areas marked "cut out" at this time. Fold the fence along the dotted line as shown in the diagram and glue it to itself. Be careful not to get glue on the two tabs. Now, cut out the areas marked "cut out" cutting through both layers of card stock. Bend the two tabs as shown and glue the fence to the base.
